PROFILE SUMMARY

B.Tech (CSE) undergraduate and **Google Advanced Data Analytics Certified professional** seeking a Data Analyst Internship. Proficient in SQL (CTEs, Window Functions, multi-table JOINS), Python, and Power BI with hands-on experience building ETL pipelines, developing executive-level dashboards, and extracting insights from **99,441+** records across 7 datasets. Skilled in DAX, KPI reporting, RFM segmentation, and translating complex data into actionable business intelligence.

TECHNICAL SKILLS

- SQL & Database:** MySQL, Complex Queries, CTEs, Window Functions (LAG, RANK, PARTITION BY), Multi-Table JOINS, Subqueries, Aggregations, SQLAlchemy, Data Ingestion Pipelines.
- Business Intelligence & Visualization:** Power BI, DAX, Power Query, Dashboard Development, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, COUNTIFS), Data Storytelling, Stakeholder Reporting.
- Data Analysis & Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), ETL Processes, Data Cleaning, EDA, RFM Segmentation, KPI Definition, Statistical Analysis, Data Modeling, Star Schema.
- Analytics Concepts:** Predictive Analytics, Customer Segmentation, Churn Analysis, Revenue Analysis, Trend Analysis, A/B Testing.
- Tools & Technologies:** Git, Jupyter Notebook, VS Code, MS Office Suite.

PROJECTS

E-Commerce Sales Analysis and Dashboard | SQL, Python, and Power BI | [Link](#)

- Designed and automated an end-to-end ETL pipeline using Python and SQLAlchemy to ingest 7 CSV datasets (**99,441 customers, 103K+ orders**) into MySQL with transaction rollback handling and logging — eliminating manual data entry.
- Wrote **12+ complex SQL** queries using CTEs, Window Functions (LAG, PERCENT_RANK, PARTITION BY), and multi-table JOINS to extract insights: identified 87,189 churned customers, **₹71.9L YoY** revenue growth (2016→2017), 12.5-day avg delivery time, and delivery bottlenecks across 10+ states.
- Built a Power BI dashboard with 12+ KPIs (**₹16.01M revenue, 99K orders, ₹160.99 AOV**) tracking sales trends, regional performance, top product categories, and payment distribution across 4 interactive filters.

Hospital Management Analytics Dashboard | Power BI, Excel, DAX, Power Query | [Link](#)

- Integrated 16 hospital datasets into a star schema model using Power BI relationships and Power Query transformations, consolidating patient flow, billing, prescriptions, and doctor availability into 6 tables for scalable reporting.
- Engineered **20+ DAX measures** to define and track **10+ KPIs** across patient operations and revenue metrics; identified key healthcare performance indicators enabling data-driven operational decision support.
- Developed 2 interactive multi-page dashboards with dynamic slicers and drill-throughs, translating complex hospital data into executive-level insights for stakeholder reporting and resource planning.

Bank Customer Churn Analysis | Excel, Pivot Tables, Multi-Dimensional Segmentation, KPI Dashboard | [Link](#)

- Analyzed 10,000+ banking customer records across 18 attributes using Excel pivot tables, COUNTIFS/AVERAGEIF formulas, and multi-dimensional segmentation to identify key churn drivers and quantify \$186.3M revenue at risk.
- Uncovered actionable insights: Germany showed 2x higher churn vs France (**32.4% vs 16.2%**), inactive members face 2.6x attrition risk, and complaints correlated with 99.51% churn — delivering targeted retention recommendations.
- Built an interactive KPI dashboard with 15+ metrics tracking customer segmentation by card type, balance category, and geography; documented findings in an executive summary for stakeholder presentation and business decision support.

EDUCATION

- Bachelor of Technology (B.Tech) | Computer Science Engineering** Expected Graduation: May 2027
Babu Banarasi Das University, Lucknow

CERTIFICATIONS & EXTRA CURRICULAR ACTIVITIES

- Google Advanced Data Analytics Professional Certificate** | Coursera | January 2026 7-course specialization in Python, SQL, data analysis, business intelligence, dashboarding, and stakeholder reporting.
- Tata Data Visualization Job Simulation** | Forage | September 2025 — Analyzed business datasets and designed executive-level Power BI reports to communicate data-driven insights for strategic decision making.
- Deloitte Australia Data Analytics Job Simulation** | Forage | December 2025 — Built Tableau dashboards and conducted forensic data analysis to identify patterns and operational inefficiencies across business datasets.
